Agent Host Information

Number Of Profiles: 1

Current Profile: sample-profile

Agent Host Information

host(s)

(example: host1,host2 or xxx.xxx.xxx.xxx - yyy)

☐ Use IP Address Range

(example: 178.16.145.244 - 248)

Choosing Your Agent Host

Hosts can either be specified by name or by address. There are two possible ways of specifying multiple hosts. One way is to specify a comma separated list of hosts/addresses or by checking the use range box one can specify an IP address range to discover.

port(s)

(example: 9052,9055,9070-9080)

Choosing Your Agent Port

For specifying port numbers to run discovery against, the user can either specify one port (or a range of ports) or a number of ports separated by a comma.
